

Pel'Camino PC 11

plainest handling

PELLETS-STOVE

dimensions:

77 x 73 x 100,5 cm

weight:

180 kg

heat capacity:

3,4 - 11 kW

efficiency factor:

ca. 92 %

operational autonomy:

max. 75 hours at minimum power

capacity of storage container:

max. 45 l

hourly consumption:

max. 2 kg/h - min. 0,5 kg/h

bus bar:

230V/50Hz ready to plug in

With a heat capacity of up to 11 kW, Pel'Camino can also be used as a central heating system. 100m² of living space are heated easily because of the efficiency factor of 92 %.

Pel'Camino PC 11 can be combined easily with a thermostat and a clock relay.

The big storage container contains 45 kg of pellets, thereby heating is possible for days.

By heating with pellets you contribute essentially to ecologically friendly heating. Pellets are a renewable source of energy from native forests and the combustion sets free the same amount of CO₂ like it's been done by the natural photosynthesis, hence pellets are pollution neutral.
